

Parameters for Speed Factors:

- Competitor's Speed Factor is based on the "median" competitor's individual stage times.
- 75% of a competitor's stages per event, rounded down, are counted.
- Competitor must have completed 4 stages to get an event Speed Factor; he/she does not have to finish the event.
- Pikes Peak does not count (not "really" a rally).
- Stages having "median" times of less than 3 minutes don't count.
- Use all RA National events from the previous year, plus the current year.
- Speed Factor is average of competitor's best three events in that period.
- FIA and Canadian entrants will be handled on a case by case basis.

Competitors who believe that their Speed Factor should be adjusted because of some extraordinary situation may contact John Buffum at: LibraRally@aol.com or the event stewards.

Median Speed Factors
